DETAILED ACTION

This application is a 371 of PCT/US00/00938.

Claims 39-70, 73-86 and 89-97 are pending and allowable. Due to a potential interference the claims are restricted.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 39-49, 61-63 and claims 67-70, 73-86, 89-97 (in part), drawn to a mouse serine racemase of SEQ ID NO:8, a polynucleotide encoding thereof, including SEQ ID NO: 1, a vector and a host cell comprising said polynucleotide, a method of making said serine racemase and a method of use of said racemase.

Group II, claim(s) 50-60 and claims 67-70, 73-82, 86, 89-97 (in part), drawn to a human serine racemase of SEQ ID NO:10, a polynucleotide encoding thereof, including SEQ ID NO:9, a vector and a host cell comprising said polynucleotide and a method of making said serine racemase using a polynucleotide encoding thereof.

Group III, claim(s) 64-66 and claims 83-85 (in part), drawn to methods of use of human serine racemase of SEQ ID NO:10.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of Group I is mouse serine racemase and a polynucleotide encoding thereof. The special technical feature of Groups II-III is human serine racemase and a polynucleotide encoding thereof. Serine racemases and polynucleotides encoding thereof of Groups I-II are structurally different products and have different properties. Therefore, where the structural identity is required, such as for the production of the specific antibodies, therapeutic effects, hybridization and expression, the different sequences have different effects. A method of making and a method of use of the first product, mouse serine racemase, are included in Group I. Group III is drawn to a method of use of the second product, human serine racemase. 37 CFR 1.475 does not provide for multiple products or methods within one application. Therefore, unity of invention is lacking with regard to Groups I-III.

A telephone call was made to Ms. Lisa Hemmendinger on October 8, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

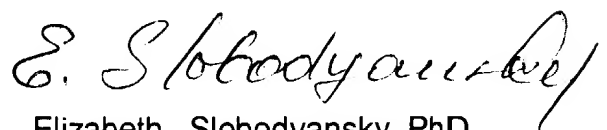

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
